SUMMARY

Graduated in Computer Science and working in the field since 2019, I am a developer dedicated to building innovative, functional, and scalable digital experiences. With a strong background in HTML, CSS (Sass and Tailwind), PHP, JavaScript (Vanilla and frameworks like ReactJS), and stacks like Node.js, I specialize in developing responsive, dynamic, and custom applications and websites.

Throughout my career, I have leveraged a variety of tools and technologies to deliver projects that uphold design precision and user experience. I incorporate tools like Figma to create intuitive interfaces and Docker to ensure consistency and scalability in development and deployment. Additionally, I value clean code practices and continuously seek professional and personal growth through courses and ongoing learning in the tech field.

My expertise spans from building custom web solutions to developing robust applications in CMS tools like Wordpress/Strapi/CraftCMS, always prioritizing high design fidelity and enhanced usability.

EXPERIENCE

Mid-level Web Developer

DAYTWO

June 2022 – July 2024, Sao Paulo, Brazil

- DAYTWO specializes in bringing brand stories and specializes in websites, digital services, and advertising websites, and content strategy.
- Consistently utilized **HTML**, **CSS (Sass and Tailwind)**, and **JavaScript** with frameworks like **ReactJS** and **NextJS** to develop responsive and dynamic web applications.
 - Leveraged **Node.js** and **PHP** to build scalable, data-driven websites using **CraftCMS**.
 - Translated **Figma designs** into functional, visually precise applications across all company projects.
 - Ensured **optimal user experiences** and efficient data handling by integrating modern web technologies.
 - Streamlined development and deployment workflows using **Docker**, promoting environment consistency and scalability.

Web Developer

FutureBrand

October 2021 – June 2022, Sao Paulo, Brazil

- FutureBrand seamlessly combines expertise in brand strategy, identity, digital, retail, environmental, product and service design.
- Implemented **HTML** and **CSS (Sass)** to build custom, responsive WordPress websites.
 - Developed interactive and dynamic features using **Vanilla JavaScript** and its frameworks, **ReactJS** and **NextJS**.
 - Enhanced WordPress functionality and design flexibility with **PHP** and custom coding solutions.
 - Achieved a **high level of design accuracy** by translating **Figma mockups** into pixel-perfect implementations.
 - Delivered **seamless user experiences** through optimized performance and responsive design.

Web Development Trainee

Tinpix

June 2021 – October 2021, Sao Paulo, Brazil

- Tinpix is a digital studio that focuses mainly on web design, ecommerce, branding and mobile apps development services.
- Implemented HTML (with Jade/Pug templates) and CSS (Sass) for custom WordPress websites.
 - Developed responsive, user-friendly interfaces using ReactJS and Vanilla JavaScript.
 - Expanded WordPress functionality and design flexibility through custom development.
 - Utilized PHP to integrate dynamic features and customize WordPress themes and plugins.
 - Collaborated on designs created in Figma to ensure accurate implementation.

Back End .NET Trainee

Intermeio Soluções de Pagamento

September 2019 – December 2019, Brazil

- Developed **.NET applications** using **C#**, ensuring robust and maintainable code.
- Designed and managed databases with **SQL Server**, optimizing queries and ensuring data integrity.
- Created and integrated **RESTful APIs** to enable seamless communication between applications.

PROJECTS

Nutri Karen Oliveira

Freelancer • nutrikarenoliveira.com.br • May 2024 – June 2024

- Designed and developed a responsive WordPress website using **PHP**, **React**, and **jQuery**, ensuring an intuitive user experience across all devices.
- Created custom functionalities and dynamic content with **React** and **jQuery**, enhancing interactivity and performance.

- **Personally designed** the website, ensuring pixel-perfect, visually consistent web pages that align with the project's goals.
- Optimized the website for **SEO** and performance, improving page load times and search engine ranking.

Nordic Batteries

Daytwo • nordicbatteries.com • May 2023 – June 2023

- Developed a responsive and dynamic website using **CraftCMS**, **PHP**, and **MySQL**, ensuring efficient content management and smooth database performance.
- Integrated interactive features with **React**, enhancing functionality and improving user engagement.
- Maintained high **design fidelity** by translating **Figma mockups** into accurate, visually appealing pages.
- Optimized the website with **SEO best practices** and a scalable architecture for future growth.

Milenio Capital

FutureBrand • <https://www.milenio.capital> • November 2021 – December 2021

- Developed a highly responsive and optimized website using **HTML**, **CSS (Sass and Tailwind)**, **JavaScript**, and **jQuery**, ensuring seamless performance across mobile and desktop devices.
- Ensured **design fidelity to Figma mockups**, translating them into interactive and visually accurate user interfaces.
- Integrated **SEO best practices** and accessibility features to enhance user experience and improve website visibility.

EDUCATION

Bachelor in Computer Science

Universidade Paulista, UNIP • Brazil • 2023

CERTIFICATIONS

AWS Beginner to Advanced Course

Udemy • 2024

Complete Web Development Bootcamp

Udemy • 2021

Git/Github

Udemy • 2019

SKILLS

HTML

CSS | Sass | Tailwind

Javascript | ReactJS | NextJS | NodeJS

PHP | Twig | Jade | Laravel

Git/Github

MySQL

Figma | Adobe XD
